

Room set-up suggestion for Rik's comedy show

Sound / AV Requirements:

- One wired microphone on stand.
- One additional microphone line onstage for me to use for the guitar (I have an adapter that plugs in where the microphone would go)
- PA system sufficient for the room.
- A monitor on (or in front of) the stage.

Lights:

- There should be a spotlight, or lights facing the performer. Or, all house lights should be “up”.

Staging:

- Please sit the audience **AS CLOSE TO THE PERFORMER** as possible. **AVOID** separating the crowd from the PERFORMER with a buffet line, etc., This is really important for the success of the show.
- If the room set up is rectangular, place the stage in the middle of the longest wall (see below)
